Fixscreen® 150<sup>EVO</sup>

Wind-resistant, vertical sun screen with Connect&Go<sup>®</sup> technology
Fixscreen® 150<sup>EVO</sup>

Introduction
The RENSON® Fixscreen® 150<sup>EVO</sup> brings a major evolution in the quality, design and installation of large vertical sunscreens. The patented Connect&Go® technology ensures that the fabric roller tube is easy to install and removed. The electrical cable can simply be concealed in the sidechannels, this ensures an easy way of installing the headbox or replacing the motor or fabric. Besides the current Softline box design, we designed a new sleek Square design in response to strong market demand. We have optimized the design of the box in order to ensure that the bottom bar will disappear, up to 2700 mm high, into the head box without changing any dimensions of the box! The Fixscreen® technology ensures that the screen is windproof in any position. Flapping and torn fabric are therefore things of the past.

Product
Simplified installation thanks to:
- Connect & Go® technology - NEW! Patented waterproof electrical connection between the plug on the fabric roller tube and the plug in the box, with the following major benefits:
  - Easily installed/removed fabric roller tube
  - Easily replaced motor/fabric
